

RFP TM-19-03  
Technology for Buses  
Questions and Answers  
May 29, 2019

- Q1. Regarding the APC, 10 vehicles are equipped with Info DEV DA-200 sensors. How are the sensors currently used if there is no Onboard computer (e.g: GW 400)?
- A1. All information is stored in the Digital Recorders DR700 annunciator system.
- Q2. Could you provide the communication protocol and physical interface for the existing APC equipment?
- A2. The onboard communication is via hard-wire. Upon return to the garage, the information is downloaded over wi-fi.
- Q3. Regarding the Twin vision headsigns: how are they currently used?
- A3. The external signs display route information alternating with informational messages, e.g. “Route 7 – Washburn” and “Have a nice day!”

End of Q&A for May 29, 2019.
